Xavier MRZ Scanner Demo Privacy Statement

BlackShark Tech produces a library that uses the device's camera to preview and capture biographic information from driver's licenses and travel documents. The device's camera is only used to preview and capture the images for the purpose of Optical Character Recognition (OCR) of the biographic data. The Xavier MRZ Scanner Demo and the Xavier library do not collect or transmit any data that is acquired from the OCR scans. All collected data is displayed on the device only. Images and biographic data are used solely to display on the local device to demonstrate the OCR of the Machine-Readable Zone of the scanned travel documents. Basic analytic data is collected for diagnostic purposes including: operating system, operating system version, manufacturer and device model. None of the biographic information gathered by the scanner is transmitted.
